

Paradigm Shift: How Geoinformatics is Changing our Understanding of Healthcare

Learning Objectives:

1. Describe the science of geoinformatics and how it can be applied to understanding complex healthcare problems
2. Examine ethical concerns of privacy associated with the use of health geoinformatics
3. Identify practical ways health geoinformatics systems can affect healthcare from individual patients to populations

SPEAKER

J. Russ Butler, PhD

Director, Center for Population Health
Professor of Biology
AdventHealth University

SPEAKER

Craig Gillen, BS

Geographic Information Systems Research
Coordinator/Analyst
AdventHealth University

SPEAKER

Seth Wiafe, PhD, MPH

Director, Health Geoinformatics Sciences
Loma Linda University
School of Public Health

MODERATOR

Grace Oei, MD, MA

Assoc. Director, Center for Christian Bioethics
Assistant Professor of Pediatrics
Loma Linda University
